

A unique Science-Business Platform

Teaming Up 4 Forests (TU4F) is a science-business platform addressing the most critical challenges for the sustainable provision of wood and wood-based products, thereby directly contributing to the UN Sustainable Development Goals.

Science-led

Grounded in sound research from the world's leading scientists.

Business-relevant

Translating complex findings into actionable insights for industry stakeholders.

Your Science-Backed Strategic Advantage

TU4F connects your organization directly to IUFRO's global network of scientists, giving you an evidence base that builds credibility and drives sustainable decisions. Partners gain visibility at the highest international forums on topics that define the future of forestry:

- Production-biodiversity balance
- Climate resilience and sustainable wood supply
- Policy, ownership, and sector innovation

Partnering with TU4F enables your organization to:

- Access trusted scientific expertise and global research networks.
- Stay informed about emerging forest-related challenges and opportunities.
- Engage directly with researchers, policymakers, and other key stakeholders.
- Influence the policy decisions made at regional and global level.
- Support the exchange of knowledge between science and practice.
- Help advance sustainable, resilient, and productive forest landscapes.
